ENVIRONMENTAL COMPLIANCE

THE IMPORTANCE OF ENVIRONMENTAL COMPLIANCE

As a reconditioner of drums and bulk containers for the past three decades, Mid-America Steel Drum Company has become the *industry's benchmark for quality*. In our industry, quality not only pertains to product attributes and timeliness of deliveries, but also to how we interact with the environment. We at Mid-America Steel Drum Company understand that the environment is a precious resource that must be protected. It is for this reason that we regard environmental compliance as an integral part of our operations. By complying with regulations set forth by our local, state, and federal agencies, we provide our customers with another level of quality and peace of mind.

General Regulatory Information

WASTEWATER DISCHARGE PERMIT #1011.03

- Expiration Date: November 10, 2015

Semi-annual sampling conducted by Milwaukee Metropolitan Sewerage District: Semi-annual sampling executed internally

EPA TITLE V AIR PERMIT #241021220-P01

- Filed: July 1995
Administratively Complete:
January 2014

Daily record keeping, and monthly/annual reporting regarding toxic air emissions

Annual SARA 313 reporting for toxic air emissions

How do we Comply?

In accordance with the RIPA's (ReUsable Industrial Packaging Association) Code of Operating Practices, Mid-America Steel Drum Company complies with all pertinent environmental agencies regarding air emissions, wastewater, and waste disposal. Compliance with all of these organizations and regulations is a part of our daily operations. With an in-house certified wastewater operator, we have constant monitoring and treatment of our wastewater stream. In addition, to comply with EPA regulations, we record daily levels of plant emissions for air quality purposes. The following list details all of the environmental agencies, permits, measurements, and monitoring that Mid-America Steel Drum Company complies with regarding the environmentally secure operations of our facilities.

national coverage <> local care

REPACS: What's the big deal?

National coverage and local care from a network of ten independent and geographically diverse steel drum, plastic drum and IBC reconditioning companies. All locally owned and operated.

- The most technologically advanced provider of packaging services for National and Regional multi-location Industrial and Commercial fillers and emptiers.
- Protecting the environment through responsible, environmentally safe life cycle empty container management.

Are dirty drums/IBC's becoming a problem for you or your customers?

Any of the REPACS members can be of help.
